

# PSI Gas Management

## A Suitable Solution for each Task

Cooperation agreement

Regulation of the German gas sector has resulted in intensified cooperation amongst gas suppliers. Business processes must be continually adapted based on the established market model and existing agreements. Hence they are becoming increasingly standardised on various levels. The implementation of new regulations is required in less time. The notion of customer service is having a new significance and communication is becoming more important than ever.

PSI offers for this dynamic business area solutions that guarantee the required security for implementing and customising our customer's business processes on-time and at optimal cost.

The solutions offered by PSI are modular and scalable. The company can integrate these modules into all existing IT environments. Modules are pre-configured as standard for each market player.

**PSI solutions guarantee dependable and cost-optimised execution of business processes as well as securing future investments.**

### **PSIPortal**

Adaptable customer request, contract and nomination management with seamless integration to all of PSI's solutions.

### **PSIGaps**

Gas Business Planning and Analysis System for planning and sales planning, price mapping, purchase optimisation and storage assessment.

### **PSIMarket**

Planning, trade and sales system.

### **PSITransport**

Contract management and disposition for the gas market.

### **PSIControl V7**

PSIControl, a control system which has successfully been operated by gas suppliers for over 3 decades, is in its 4<sup>th</sup> generation after going through an extensive upgrade.

### **PSIGanesi**

Gas grid simulation for every area of application: Gas grid planning, online simulation and reconstruction and the exact determination and calculation of heat quantities.

### **PSIComCentre**

Quick, secure and standardised communication of business messages (Edig@s, plain text, Excel, XML) between all market participants.

### **PSIR-Win**

Standardised system for all revision and calibration tasks for gas measuring equipment.

### **PSIGamess/IAS**

Retrieval, processing and distribution of all relevant accounting data (measurement, quantity and counter values) for subsequent systems.

### **PSIDaisy I**

Downstream Accounting and Information System (billing system).

### **PSIDaisy II**

Downstream Allocation and Information System (allocation system).

### **PSI Maintenance & Service**

Complete support including software care and preventative service, hardware maintenance and 24 hours a day on call.

### **PSI Aktiengesellschaft für Produkte und Systeme der Informationstechnologie**

Dircksenstr. 42-44

10178 Berlin
